

RTO No: 40507

Working Safely at Heights

This course provides both theoretical and practical instruction for the use of methods, equipment and procedures for working at heights safely.

This training and assessment program focuses on the Hazards and Risks, associated with work tasks undertaken at heights greater than two (2) metres, and reviews for works under two (2) metres.

It is designed to establish a clear understanding in the legislative requirements for working at heights, also selection, selection and use of various plant and equipment, with high level attention to detail in the use of personal fall restraint and or fall arrest equipment, whilst working at heights.

Course Code: RIIWHS204D

Recognition: Nationally recognised unit of competence for works conducted on both domestic and commercial work sites through out Australia.
A Statement of Attainment is provided on successful conclusion of this course.
