LICENCE TO PERFORM HIGH RISK WORK - Elevated Work Platform (Boom Length 11 meters or more) TLILIC2005A

As of the 1st of July 2007, under the Occupational Health and Safety Regulations 2007 previous certificates of Competency for the operation of certain Plant and Equipment were replaced by Licences for High Risk Work (LHRW).

This course is designed to provide students with practical and theoretical training and assessment to establish competency to operate an order picking fork lift truck.

Refresher training is also recommended periodically every three years for holders of Licences to operate plant and equipment licenced by state authority.
