Making OHS - WHS management easier
with the Active TEC OHS-E Administration System.

ACN: 145 630 244

Are you a small to mid sized company with limited resources and time ?

Do you need a OHS / WHS management system that assists you to develop compliant documents policies and procedures ?

If you answer is **"YES"** then take a moment to consider the Active TEC OHSE Management System.

Our second generation software interface is easier to use and better than ever !

The OHS-E management system is designed to be utilised on your computer, to develop both **OHS & WHS** documentation for the varying legislation, across the states and territories in Australia.

It is "Dashboard" driven and utilises software that most people are familiar with such as: Microsoft Excel, Word, PowerPoint and all P.D.F Readers.

Each "Button" on the dashboard provides you with Plans, Policies, Risk Grading Assessment and Safe Work Method Statement documents that you can alter with a combination of drop down boxes, to insert data and minor written information from the person creating the documents.

This Includes:

Site Management Plans	Dispute Resolution Procedures
Risk Grading Assessments	Induction Orientation Booklet
Safe Work Method Statements	Induction Slide Show
Sign In records	Codes Library
Site Checklists	Quality Control Document
Policy Statements	Site Environmental Management Plan

We can tailor the system to add important documents and procedures you want to access from one place !

You purchase the license to utilise the system once, and your company is licenced to reproduce documents for its projects and tasks without restriction or additional costs.

Our Consultants conduct a review of you current documents and procedures prior to developing your new interface.

Price $ 5,120.00 + G.S.T (no hidden or additional yearly licensing fees)
