Making OHS WHS Management easier with the ATEC OHSE Administration System.

Are you a small to mid sized company with limited resources and time ?

Do you need a OHS / WHS management system that assists you to develop compliant documents policies and procedures ?

If you answer is "YES" then take a moment to consider the Active TEC OHSE Management System.

Our OHSE management system is designed to be utilised on your computer, to develop both OHS & WHS documentation for the varying legislation, across the states and territories in Australia.

It is "Dashboard driven and utilises software that most people are familiar with such as: Microsoft Excel, Word , PowerPoint and all P.D.F Readers.

Each "Button" on the dashboard provides you with Plans, Policies, Risk Grading Assessment and Safe Work Method Statement documents that you can prepare with a combination of drop down boxes to insert data and minor written information from the person creating the documents.
