Active TEC Health and Safety Support Membership

Why have a Health and Safety Support Membership?

Companies, management and employers must provide a safe and compliant workplace indicated by Health and Safety Legislation.

Active TEC provides information support program to a registered member, being a person nominated to implement and monitor health and safety within their company or business.

The registered person is identified as that company or businesses "Health and Safety Officer" and shall be required to hold current OHS/WHS training and certification.

Active TEC consultants can provide expert Work Place Health & Safety (WHS) Occupational Health & Safety (OHS) and also Environmental (EHS) information and support.

The implementation of a Health and Safety Program protects "personnel" and reduces the likelihood of incidents and accidents.

Those "in charge of others" who fail to meet safety requirements are subject to penalties imposed by the relevant OHS authority.

Active TEC shall also provide a mediation services and advice should conflict between Clients, Contractors and Employees arise, and our consultants may act on your behalf to "mediate and resolve issues" identified by the Health and Safety Authority.

This membership and service is only offered to companies that have trained Safety Officers that have completed an acceptable course, and has retained currency where applicable.

This method tends to ensure the information provided is consistently delivered via one source at your workplace and removes the likelihood of incorrect interpretations often associated with a large number of individual interpretations.

Our accredited consultants are able to provide those developing and managing compliance within their business expert support , predominantly by answers to questions that may otherwise and if not answered correctly, may result in "non-conformances" with Acts, Regulations , Codes and Standards.

What Services are included within the Annual membership fee?

Members are provided:

· One framed "Membership Certificate" identifying the company and their nominated Health and Safety Officer (HSO).

· The Nominated Health and Safety Officer (HSO) to be registered on the Active TEC HSO Register.
